

## INTRODUCTION

Polymer Systems INMOULD and POSTMOULD graphics are two revolutionary processes allowing you to apply any label, graphic or identification to rotationally moulded polyethylene products.

These systems are designed for product logos/names, sequential numbering/coding, barcodes, warning instructions, four colour process prints and many more decorative designs which are fully embedded into the resin during or after the moulding process.

Polymer Systems uses UV pigments that have been developed for versatility and high performance stability for indoor or outdoor use. These pigments have been subjected to 2000 hours accelerated weathering tests in Xenon arc weatherometer equating to 24 months exposure in an extreme temperature climate, without any noticeable colour change or degradation.

Polymer Systems graphics simply will not become distorted, peel off or lose their vibrance. They also have a very high chemical resistance. Their process of application is easy to learn and requires no special operator skills.

## OUR INVOLVEMENT

Polymer Systems graphics have been used and refined since 1997 and are rapidly increasing in popularity, mainly because of their ease of application and clarity in colour and detail.

Polymer Systems International Ltd has become a much valued, service oriented supplier of graphics to Moulders Worldwide.

## THE COST

The cost is determined according to the size, number of colours, detail and quantities required. We consider our prices very competitive and quotations are readily available with no obligation to order.

## QUOTATION

For an accurate quote we request completed artwork along with details of the size, colour and quantities required. This can be done using phone, fax or mail direct to Polymer Systems or email artwork as an .eps or vector file to - [sales@polymerinternational.co.nz](mailto:sales@polymerinternational.co.nz) Polymer Systems uses the PANTONE colour matching system, so quoting PANTONE colour matching numbers will ensure a speedy response. Usually the quotation will be returned to you within the next day of receiving artwork. Prices are quoted in New Zealand dollars (unless otherwise specified) and are valid for 30 days.

## ORDERING

To eliminate communication problems we recommend the customer places orders direct with Polymer Systems.

Before an order is placed, a direct credit application form will need to be completed and returned to us.

## DELIVERY

For your new graphics where new artwork maybe required, delivery time from date of order and proof approval is usually four weeks. For a duplication of previous orders a delivery time is usually within three weeks from date of order.

All graphics are delivered via Courier Post unless otherwise specified.

Orders outside New Zealand are delivered via DHL Worwide Express unless otherwise specified.

## SUMMARY

Polymer Systems graphics make a greater impact on your product and are an excellent marketing tool. We see our graphic as another step in promoting your products and helping your business grow. We are trained in all respects and have a team ready to assist you in the great new process of our graphic systems. See our Standard Graphics Catalogue displaying a broad range of pre-designed graphic options requiring no extra setup costs.
